

Grifols Industry-Supported Seminar

Understanding the immunomodulatory effects and clinical benefits of intravenous immunoglobulin in myasthenia gravis

16th International Congress on Neuromuscular Diseases (ICNMD 2021)

Grifols invites you to their sponsored seminar entitled **Understanding the immunomodulatory effects and clinical benefits of intravenous immunoglobulin in myasthenia gravis.**

Join our distinguished experts as they explore the broad immunomodulatory effects of IVIG in myasthenia gravis (MG) and provide updates on the IVIG treatment for MG.

Introduction and The role of IVIG in the immunomodulation of MG

Prof. Dr. Marinos C. Dalakas

Department of Neurology, Thomas Jefferson University, Philadelphia, Pennsylvania, USA

New data on IVIG treatment of myasthenia gravis

Prof. Dr. Andreas Meisel

Department of Neurology, Integrated Center for Myasthenia Gravis, Charité - University Medicine Berlin, Germany
