

This is your invitation to join the Sarepta-sponsored virtual seminar at the 16<sup>th</sup> International Congress On Neuromuscular Diseases (ICNMD)

# Investigating Gene Therapy for the Treatment of Limb Girdle Muscular Dystrophies

**SATURDAY, MAY 22**

**16:15 – 17:00 CEST**

## Dear Colleagues,

We are pleased to welcome you to this Sarepta-sponsored seminar at the 16<sup>th</sup> ICNMD.

Our speakers will deliver an overview of the current needs and challenges for Limb Girdle Muscular Dystrophy (LGMD) patients including the clinical course and pathophysiology as well as what the future landscape looks like and ongoing initiatives. We will also demonstrate the importance and implications of accurate genetic diagnosis through 2 walk-through case studies. Finally, we will present the interim clinical findings of the SRP-9003-101 study and a summary of investigational programs in LGMD.

## SPEAKERS:

**Louise Rodino-Klapac,  
PhD (Chair)**

Sarepta Therapeutics Inc.  
Columbus, OH, USA

**Jordi Díaz-Manera, MD, PhD**  
John Walton Muscular Dystrophy  
Research Centre, Newcastle University  
Translational and Clinical Research Institute  
Newcastle upon Tyne, UK

**Erica Koenig, PhD**  
Sarepta Therapeutics Inc.  
Columbus, OH, USA

Time (CEST)	Presentation Title	Speaker
16:15 – 16:20	Welcome and Introduction	<i>Louise Rodino-Klapac, PhD (Chair)</i>
16:20 – 16:35	Identification and Diagnosis of LGMD Patients	<i>Jordi Díaz-Manera, MD, PhD</i>
16:35 – 16:55	Limb Girdle Muscular Dystrophy Study 9003-101 Interim Findings	<i>Erica Koenig, PhD</i>
16:55 – 17:00	Closing Remarks and Q&A	<i>All faculty Moderated by Chair</i>
