

ICNMDigital 2023 online congress

New strategies for advancing care and protecting bone health in Duchenne muscular dystrophy

Friday 1 December 2023, 15.15–16.15 (CET) / 09.15–10.15 (EDT)

Join an international panel of experts as we discuss the important role of corticosteroids in Duchenne muscular dystrophy and what this means for patient bone health. This symposium will combine a practical focus with the latest data, providing a great opportunity to put the latest research into context.

Chair: Prof Eugenio Mercuri, Catholic University, Rome, Italy

Where are we now? A review of current best practice for Duchenne muscular dystrophy

Prof Eugenio Mercuri
Catholic University, Rome, Italy

Vamorolone for Duchenne muscular dystrophy: current evidence and future development

Dr Michela Guglieri
Newcastle University, USA

What is the long-term impact of corticosteroids on bone health in Duchenne muscular dystrophy?

Dr Leanne Ward
University of Ottawa, Canada

This symposium is funded and organised by Santhera Pharmaceuticals (Switzerland) Ltd.

This presentation was approved by the Program Committee as an independent activity held in conjunction with ICNMDigital 2023. This presentation is not sponsored or endorsed by ICNMDigital 2023.
